A video link above to explain how the game works

Console Output

```
Welcome to the Forest Horror Game!, I'm a traveller like you but from 25 years ago... follow along as In read the rules
and how to play the game:

1.There is no turning back after selecting the room of choice be wise and careful with what you pick...
2.Becareful with what chest you open some may lead you to your downfall...
3.There will be riddles at the end of each room solve it and complete the game or else be stuck here forever and ever...
4.Item are usable, Don't think lighty of it...

That's all for rules. Remember traveller never LOOK BACK AS YOU MAY LOST YOUR WAY...

How may I adress you? traveller:
```

starting page

[illegible]

```

```

```
Thanks for playing Enter the Forest!
```

Select one then collect reward and game ends

Class Diagram (Too large so I will cut too smaller pieces)

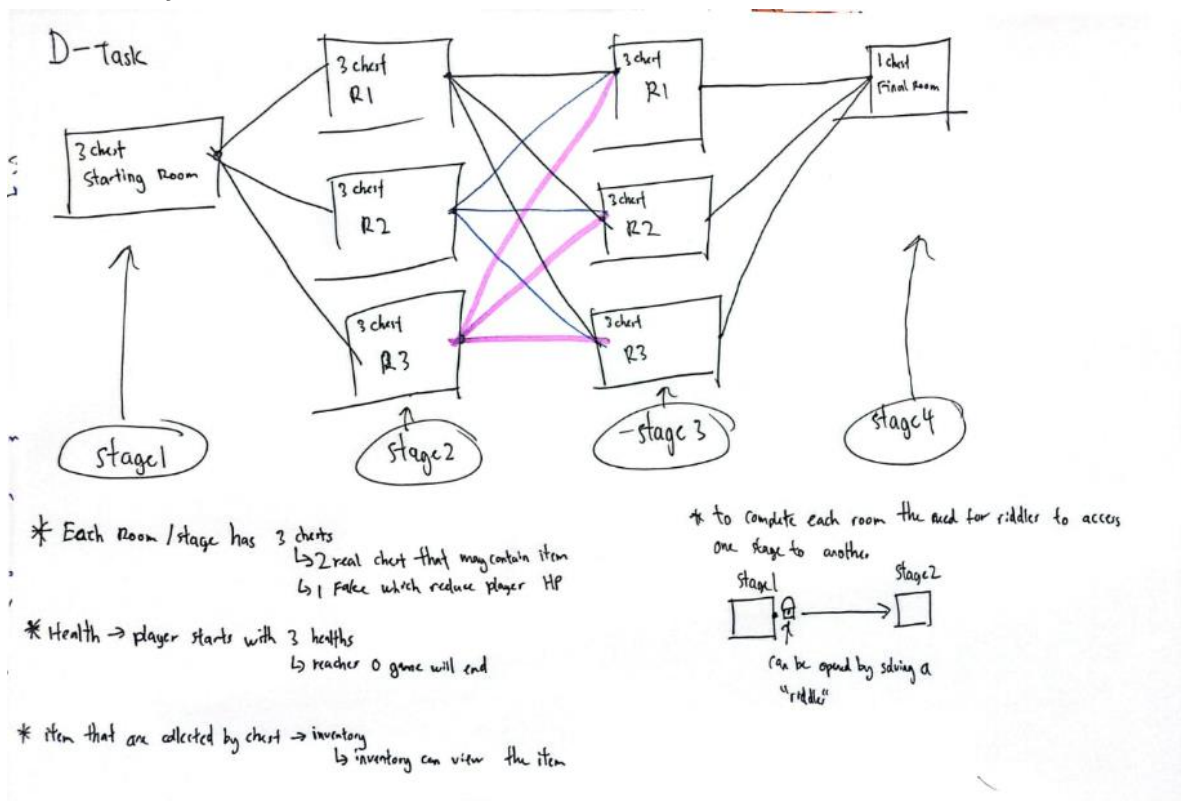

Real-Scale Class Diagram

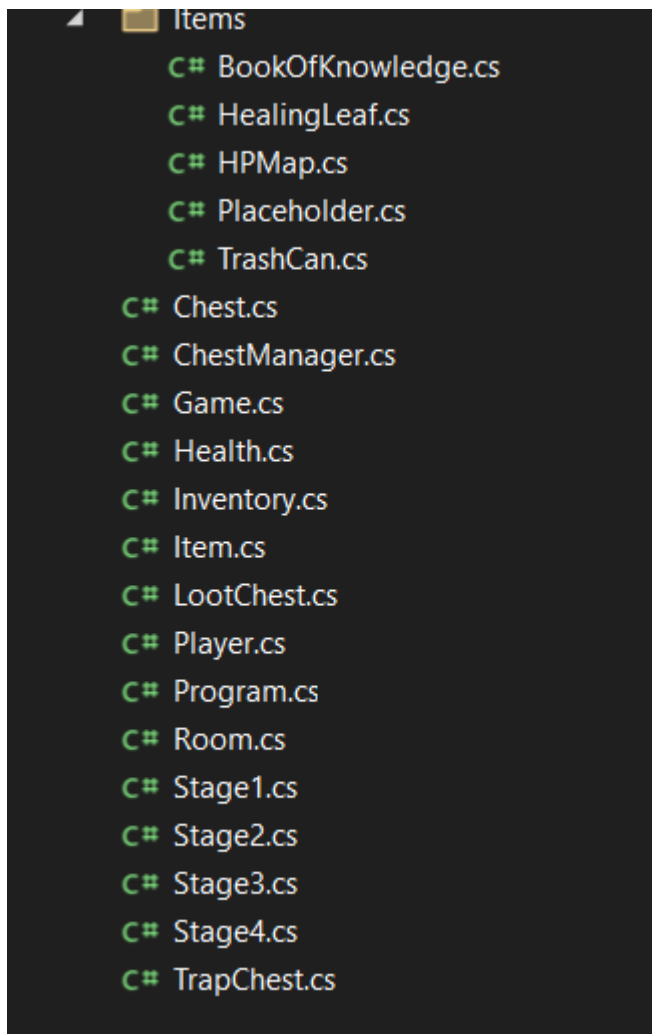

Design Idea(D level)

+This design and code focusses on basic level of my program, layout and basic functionality

each room has 3 chests- 1 is fake chest and 2 is real that contain items open the chest and the item will be store in inventory, to pass the room you need to solve the riddle at

the end of each room to move on to stage 2 then 3.

All Classes created by D custom code
